Kendall Dean Tech Rider (Solo Performance)

Kendall Dean is a solo act performing guitar, violin, looping, and singing. Although mainly acoustic act, there is ample low end in backing synths and subwoofers are necessary for performance.

Artist sends a mix of all instruments and vocals as a stereo L/R signal to FOH.

FOH SOUND SYSTEM

High quality professional sound system with adequate coverage per venue or space. Main PA must be capable of producing clean undistorted 110db at FOH mix position.

All speaker zones must have separate processing accessible by engineer at FOH mix position.

Adequate amount of subwoofers to fill venue or space.

All components must be tested and properly working prior to load in and sound check.

Please provide a sober, competent, english speaking house systems tech for load in and sound check.

FOH CONSOLE

Digital console only NO analog desks.

Please discuss venue console options in show advance.

Monitors from FOH is acceptable.

STAGE MONITOR SYSTEM

Venue to provide two high quality professional stage monitors on one stereo mix.

Monitors are to be tested and properly working prior to load in and sound check.

Wireless IEMs can be used, please discuss in show advance.

BACKLINE REQUIREMENTS

Please provide:

1 Heavy Duty Tall Boom Mic Stand (w/ standard sm58 clip)

1 Grounded circuit of clean stage power (downstage center)

1 Tall Guitar Stand w/ Yoke

1 Tall Stool

2 XLR cables (going to stage box or patch system)

Artist to provide stereo DI, and vocal microphone.

LIGHTING

Please provide a sober, competent, english speaking LD.

Overhead special focused downstage center at artist position.

No front lights directly in face.

Warm colors and blues *no green.

Intimate moody lights, with some upbeat songs that could use more color changes and movement if available.

VIDEO

If LED wall or screens are in use, Artist can provide high res logo for on screen content
